## PERSONAL PROJECTS

### AmazClone: Your Personalized Shopping Experience

- Developed AmazClone to replicate Amazon's user experience, tackling slow and error-prone traditional e-commerce platforms through automation and enhanced user interface

### Pothole Detection and Data Logging System

- Traditional pothole detection and repair methods are slow and error-prone, causing delays and safety hazards. We need innovative solutions using IoT devices to automate detection, pinpoint locations, and speed up repairs.

### Facial Emotion Recognition

- Developed a Convolutional Neural Network (CNN) model for facial emotion recognition with the aim of accurately classifying emotions expressed in images in order to enhance human-computer interaction and psychological research.

### Medical Image Segmentation

- Develop a system that can analyze and segment medical images into regions of interest by identifying and highlighting areas of concern. Our model equips medical experts with critical insights & enables them to formulate accurate diagnoses promptly.

## ACHIEVEMENTS

### WEB DEVELOPMENT

Done Internship in Technohacks as Web Developer.
